

**“I am blessed that my
cancer was
caught early.”**

During a routine physical examination, Reverend Vaughn Profit-Breaux was urged to get a free colon health screening through the Colon Health Program. Colon cancer was detected.

Rev. Profit-Breaux is doing well since his cancer diagnosis and now strongly advises others to get screened.

“I was at the right place at the right time. I am blessed that my cancer was caught early. Colon cancer is curable and preventable with screening. For your sake and that of your family, please get screened.”

Regular screening starting at age 50 can stop colon cancer before it starts. If you have a family history of colon cancer, you may need screening at an earlier age.

For more information about FREE colon health screening for residents of King County, please call the Community Health Access Program 1-800-756-5437.
